

ARE YOU **THIRSTY?** SO IS YOUR **AI.**

SAVE
THE **AI**

Asking an AI platform such as ChatGPT to **write a 100 word email** or to answer **between 10-50 queries** uses about **500ml of water** (1) the equivalent of two glasses of water or one reusable water bottle.

Next time you're filling your water bottle, ask yourself:
who needs that water more, you or the AI?
